

Amendments to Specification

In the Title: Please amend the title as follows.

**PROCESS AND APPARATUS FOR MAKING MULTICOMPONENT MELTBLOWN
WEB FIBERS AND WEBS**

In the Abstract: Please amend the Abstract as follows.

A process for forming a multiple component meltblown ~~fiber~~ fibers comprising ~~by~~ extruding a first distinct melt-processable polymer through a ~~a row of~~ first extrusion orifice orifices, simultaneously extruding a second distinct melt-processable polymer through a ~~a row of~~ second extrusion orifice orifices, fusing ~~said the~~ first and second melt-processable polymers into an extruded composite ~~filament~~ filaments after extrusion, and pneumatically attenuating and breaking the ~~said~~ extruded composite ~~filament~~ filaments with jets of high velocity gas so as to form ~~said the~~ multiple component meltblown ~~fiber~~ fibers.
